

LEVERAGING THE POWER OF DIGITAL TECHNOLOGY FOR COMMUNITY-LED MONITORING

WEBINAR 16TH FEBRUARY 09:00 AM – 10.00 AM GENEVA

BACKGROUND

Community-led monitoring is an intervention that enables communities and service users to collect data – regular localized, actionable evidence. CLM can help managers and providers improve services, programs and policies, and presents unique evidence from holistic perspectives of people who should be benefitting from services and programs. By offering these insights, CLM helps country health systems advance toward integrated person-centered approaches to provision of quality health and social services. The Global Fund 2023-2028 Strategy describes CLM as a priority intervention for evidence-based programs and policies and promotes the use of innovative digital approaches for data generation and use.

A number of tools and guidance materials are available to support country partners to incorporate CLM in their country requests. In order to enable country partners to introduce digital solutions for CLM and effectively use these tools, the Health Innovation Exchange (HIEx), in collaboration with technical partners, CLM implementers and technology partners, will be hosting a series of webinars to highlight the experiences of governments and

community-based organizations using digital solutions for CLM. These webinars are especially designed to support implementers who wish to introduce and/or scale-up CLM programs that leverage digital solutions as part of the national funding request during the Global Fund's 2023-25 allocation period. The interactive webinars will be relevant for the following audiences in considering how to describe and prioritize digital solutions within CLM in Global Fund funding requests:

- Community-led and community-based organizations
- CCMs
- Funding request writing teams of CCMs who want to understand how best to include digital solutions for CLM in funding requests
- Other stakeholders working to support CLM, including government managers, technical partners, international funders and advocates

The Webinars will be hosted on Zoom and available in English and French.

FORMAT AND AGENDA

The first of this series of webinars will be held on the 16th of February 2023 at 9:00 am – 10:00 am CET (Geneva).

These webinars are open to all stakeholders interested in CLM and/or the effective use of digital tools, and have been specifically designed to provide insights and lessons for partners who will be submitting funding requests as part of the Global Fund Grant Cycle 7. Region-specific examples and lessons learnt will be shared during the webinars, by representatives from the Global Fund, technical partners and representatives from community-led and community-based organizations that are already leveraging the power of digital tools for CLM. It will share their experiences in development,

deployment and integration of digital tools into their programs and within the Global Fund grant processes.

The interactive online sessions are structured to maximize sharing of experiences, lessons in use of digital tools for CLM and answer questions on integration of digital solutions as part of the funding request process. The agenda for the session is summarized below:

Time	Topic	Speaker
9:00 am - 9:10 am	Welcome and introductions: the potential of digital in CLM	HIEx, Global Fund
9:10 am - 9:50 am	Exemplars and lessons learned on how to maximize impact of digital in CLM	CLM Implementers and partners
9:50 am - 10:10 am	Overview of guidance, tools and support available for leveraging digital for CLM	Technical partners, Community organisations and technology partners
10:10 am - 10:20 am	Q&A	All
10:20 am - 10:30 am	Closing and next steps
